CARING FOR YOUR FURNITURE

WOOD CARE GUIDE

DUSTING AND CLEANING

Frequent dusting removes airborne deposits that build up in a filmy layer and can scratch the surface.

Clean, dry, soft cloths or feather dusters will effectively remove dust; however, to avoid scattering the dust into the air, where it floats until landing back on furniture surfaces, dampen the cloth very slightly.

TOOLS FOR DUSTING

- ◆ **Wool or Feather Duster:** A duster removes dust from easily damaged, delicate surfaces.
- ◆ **Treated Cloths:** For dusting, soft, non-scratching cloths pick up and hold dirt. Use them in place of silicon sprays, which are not recommended for fine wood furniture.
- ◆ **Soft, Lint-free Cloths:** Dampen them slightly to help trap dust.

CLEANING

Never use all-purpose cleaning sprays or chemical products on your wood furniture. You'll usually want to avoid cleaning wood with water. However, sticky spots may need to be treated with soap and water.

Here's How: dip the cloth in mild soap dissolved in water, wring the cloth nearly dry, and wipe the area. Rinse and immediately dry with a clean, soft cloth.

POLISHING

Oil polishes, cleaners, and furniture oils protect wood by making the surface more slippery; they **do not** offer a hard protective layer.

Products that contain a high percentage of oil make the surface smear, showing fingerprints. Most commercial spray and liquid furniture polishes contain silicone oil, which provides some protection. However, be aware that residues can interfere with refinishing and may need professional attention.

MARBLE CARE GUIDE

All marble ranges are finished with a durable lacquer that protects the surface of the stone.

CLEANING INSTRUCTIONS

For daily cleaning, we recommend using a damp cloth. Spillages and moist substances should be removed immediately with a cloth to avoid marks on the surface. Waxes and polishes should be avoided, as these may react with the lacquer.

Marble is susceptible to bumps and scratches on the surface and edges. We recommend that you use table mats under hot plates, mugs and glasses and protective pads under ornaments to help prevent scratching.

SINTERED STONE CARE GUIDE

Sintered stone is a manufactured product, made from a base of natural stone. It has a number of benefits including easy clean, hygienic and scratch resistant.

CLEANING INSTRUCTIONS

For daily cleaning, we recommend to wipe clean with a soft fibre damp cloth soaked in regular soap based non abrasive detergent and water.

CARING FOR YOUR FURNITURE

FABRIC CARE GUIDE

CLEANING INSTRUCTIONS

Customers often ask how they should clean and maintain our fabric suites once purchased. Here are some handy tips to get the best from your sofa.

- ◆ Every few weeks, turn cushions if possible. This helps spread wear and also helps protect fabric against fading.
- ◆ Again, every few weeks, vacuum using a soft brush attachment. This will remove any grit or dirt that has accumulated.
- ◆ If spills or accidents occur, **try to treat immediately**. For liquid spills, dab up as much as you can with kitchen paper first. Do not rub or press too hard. Then sponge down. Repeat as necessary. In the case of severe spills or staining, please consult a specialist cleaning company.
For solid spills, scrape off as much as possible with a knife, then sponge/wash/clean as above.

LEATHER CARE GUIDE

Here are some tips and tricks for keeping your leather furniture beautiful for many years to come.

- ◆ Under normal usage/conditions, regular dry-cloth dusting and vacuum cleaning in crevices or along the bottom are all that is necessary to clean your furniture.
- ◆ The use of a good leather conditioner is recommended every 6-12 months.
- ◆ Protect your furniture from sun and direct light. Like any upholstery material, leather can fade to some degree if exposed to the sun.

CLEANING INSTRUCTIONS

Always try any cleaning method in a hidden area first to convince yourself of the results.

- ◆ For minor spots and spills, wipe up any excess liquid immediately with a clean absorbent cloth or sponge. If necessary, use a lightly moistened soft cloth with clean lukewarm water and let it air dry naturally. If water is used, clean the entire area where the spot occurred.
- ◆ Do not use soap or soak the stain heavily with water. This may cause more damage than the stain itself.
- ◆ Do not use cleaning solvents, furniture polish, oils, varnish abrasive cleaners, detergent soaps or ammonia water.
- ◆ For butter, oil or grease stains, wipe off excess with a clean dry cloth and then leave alone as the spot should dissipate into the leather after a short period of time.
- ◆ If the stain persists, it is recommended that a professional leather specialist clean the leather to avoid any potential damage to the leather itself.
- ◆ For minor or slight scratches on the surface, use a chamois or clean fingers to gently buff the scratch. If needed, moisten lightly with distilled water to work scratches out.
- ◆ Remember that leather is a natural product and requires some care to maintain the natural beauty of the hide.
